Now in black matt: mixer taps, soap dispenser and pop-up remote control.

Completely black

Striking, elegant and timeless all at once: the colour black is a sought-after design element when putting together discerning interiors. Black can take a starring role in almost all elements of the kitchen and chimes with a range of different interior styles. The colour looks superb when combined with natural wood, exposed concrete and white. The new black matt fits perfectly with this trend, and Blanco now offers two mixer tap models and a number of accessories in this shade. Linus, Linus-S and Blanco Catris-S Flexo with a flexible outlet now comes in the new colour, offering perfect coordination across your living and kitchen space. The Lato soap dispenser is also available in black matt, as is the pop-up button for draining the bowl. Thanks to its cylindrical shape, it fits perfectly with the mixer taps.

The high-quality mixer taps and accessories for the kitchen water hub also delight with their satin-matt full area black surface and uniform depth of colour. They can be combined with an array of sinks and bowls in Silgranit, Ceramic and Stainless steel. They set fantastic accents in kitchen settings that feature contrasts between light and dark. As such, the new Silgranit concrete-style shade is practically made to be paired with black matt mixer taps and soap dispensers, creating a high-contrast yet harmonious look.

Completely black: Blanco now offers selected mixer taps and a soap dispenser and pop-up remote control in black matt. The new colour provides a markedly uniform satin-matt look, making it great for pairing with Silgranit sinks and bowls in the new concrete-style colour.
